BS Civil Engineering, METU, (Ankara, Turkey)

MS Civil Engineering, University of Wisconsin (Milwaukee, USA)

Ph.D. Industrial Engineering / Operational Research, METU (Ankara, Turkey)

Dr. Saltık has extensive global professional experience of more than 40 years, with roles ranging from Consultant to Company Owner, Construction Manager, Project Manager and Managing Director. He has successfully delivered numerous engineering, construction, and consultancy projects in various countries, including Germany, Switzerland, Russia, Kazakhstan, Singapore, Pakistan, India, Libya, Iraq, Palestine, and Turkey. The total value of these projects exceeds 3.5 billion dollars and spans industries such as oil, gas and refinery; cement; prefabrication; transportation infrastructure; tourism facilities; real estate development; airport infrastructure; civil infrastructure; multi-purpose facilities; and building renovation. Dr. Saltık is proficient in Turkish, English, German, and Russian.

Dr. Saltık has also served as an academic faculty member, teaching courses on project management, engineering economics, optimization methods for civil engineers, introduction to structural mechanics, and statistics at METU and Yıldırım Beyazıt University in Ankara, Turkey.

As a construction expert, Dr. Saltık specializes in project management, claims and contract management, and arbitration. He has also provided management consultancy and arbitration services for various projects, including acting as sole ad hoc DAB member to EOT claim based on schedule revisions for a clean water network in İzmir Çeşme, claims preparation and arbitration advisory for a water supply and sewerage systems project in Georgia, project management consultancy for a highway project in India, prefabrication optimization software development and consultancy in Turkey.

He has attended the Association of Turkish Consulting Engineers and Architects seminar, 'Main Principles on DAB Activities held on October 5, 2023.

Dr. Saltık's extensive international experience and technical expertise make him a highly capable and respected professional in the field of construction. With a proven track record of successful project completion and a strong academic background, Dr. Saltık is well-equipped to handle complex construction disputes and provide level-headed and robust adjudication services to clients worldwide.

Representative Engagements

In 2023 he was assigned as sole ad hoc DAB member to EOT claim based on schedule revisions for a clean water network construction project in İzmir Çeşme.

During 2022-23, Dr. Saltık served as consultant for a FIDIC pink book and Asian Development Bank financed contract in Georgia with a value of 55 million euros. The scope of works consisted of clean and waste water networks, supply pipe lines, reservoirs, manholes etc. Services rendered by Dr. Saltık were, determining the preliminary claim quantum, performing preliminary delay analysis and EOT entitlement according to Society of Construction Law guidelines and assisting legal councils in claim preparation.
